[Fuzzled – PERL Fuzzing Framework](#)

The screenshot shows a blog interface with a dark blue header. On the left is a logo with the letter 'e'. To its right is a search bar with the text 'SEARCH BLOG'. Further right are two buttons: 'FLAG BLOG' and 'Next Blog»'. Below the header is a large black box with white text. The main title is 'INFORMATION SECURITY SELL OUT' in large, bold, all-caps letters. Below it is a subtitle in smaller, all-caps letters: 'THE TRUTH AND NOTHING BUT THE TRUTH ABOUT AN INDUSTRY FULL OF SNAKE OIL SALESMEN, PIMPS, AND WHORES. YES, I AM TALKING ABOUT INFORMATION SECURITY.' Below this is the date 'TUESDAY, MAY 29, 2007'. The main heading of the post is 'BlackHat Speakers List' in green. Below that is the URL 'http://www.blackhat.com/html/bh-usa-07/bh-usa-07-speakers.html'. A line of text reads '[ content stripped for the sake of brevity.. ]'. The main body of text begins with 'We have **Pedram** Amini talking about, yes you guessed it, fuzzing. Again. This is a dead horse, can we drag it to the glue factory already?'
